manager's compensation is largely independent of the manager's efforts. As the usual story, the manager bears the full cost of the effort that she exerts. This set up can motivate free riding among the unit managers.

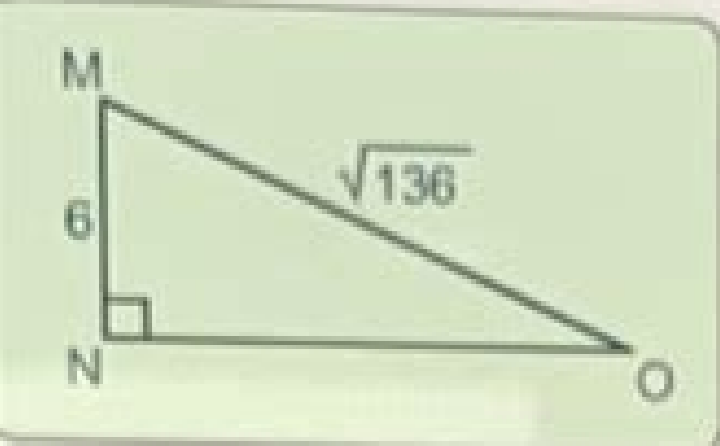

costs, with profits, and customer satisfaction, etc. Thus this is a primary motive for franchising: managers own the residual profits of their individual units which provides strong incentives.

decreased. For example, would Apple's stock price have increased if it offered more jobs to its sales people in order to hire a lower paid CEO? The key question is what does it take to attract and retain qualified CEOs. Overall, we do not have sufficient evidence to suggest that CEOs are overpaid. The possibility, however, exists.

decrease often are made by a team of executives. Usually, executive CEOs receive most of their pay in the form of profits (for example, club memberships). Therefore, the differences are somewhat increased.

given the trade-offs between risk and incentives and reasonable values for the important parameters in the theories.

decrease because of signaling effects: managers wanting more incentive compensation might signal inside information that they are optimistic about the firm's prospects.

Use the figure at right to complete each statement.

24. If $\angle 3 \cong \angle 5$, then $m_1 \parallel m_2$ because
Alt. Ang. are \cong when $m_1 \parallel m_2$

25. If $m\angle 2 + m\angle 5 = 180^\circ$, then $m_1 \parallel m_2$ because
Same Side Int. \angle s are \supset when $m_1 \parallel m_2$

26. If $\angle 4 \cong \angle 8$, then $m_1 \parallel m_2$ because
Corresponding \angle s are \supset when $m_1 \parallel m_2$

Given: $\triangle ABC$ is isosceles; $EG \parallel HU \parallel DC$, FG is the midsegment of $\triangle ABC$, and H is the midsegment of trapezoid $EGCD$. Find each measure.

27. $m\angle C = 72^\circ$ 28. $m\angle BAC = 67^\circ$ 29. $BC = 4$ cm 30. $m\angle D = 112^\circ$

31. $FG = 1.25$ cm 32. $m\angle D = 67^\circ$ 33. $DC = 3.75$ cm 34. $HJ = 1.25$ cm 35. $m\angle DEF = 112^\circ$

36. Find the sum of the measures of the interior angles of a 20-gon. $(20)(90) = 3240^\circ$

37. Find the measure of an interior angle of a regular Octagon. $\frac{360}{8} = 45^\circ$ $180 - 45 = 135^\circ$

38. Find the sum of the measures of the exterior angles of a decagon. 360°

39. Find the measure of an exterior angle of a regular heptagon. $\frac{360}{7} = 51.43^\circ$

N, O , and P are the midpoints of the sides of $\triangle KLM$.

40. If $NO = 3x$ and $KM = 5x + 12$, find NO . $3x = 2.5x + 12$

41. If $NO = 8$, $OP = 7$, and $NP = 11$, find the perimeter of $\triangle KLM$. 56 units

42. Find the slope and midpoint of the segment with endpoints at $(-1, 4)$ and $(6, -4)$. $m = -\frac{8}{7}$, $(\frac{-1+6}{2}, \frac{4+(-4)}{2}) = (\frac{5}{2}, 0)$

43. Find the slope and midpoint of the segment with endpoints at $(1, -4)$ and $(-6, 1)$. $m = -\frac{5}{7}$, $(\frac{1+(-6)}{2}, \frac{-4+1}{2}) = (-\frac{5}{2}, -\frac{3}{2})$

44. Would the segments $4x+4$ be \parallel , \perp , or neither? \parallel

Not necessarily, everyone registered in Mypearsonlab is genius, which can solve any mathematical problem or equation. They can also have doubts about how mymathlab. Through this help sometimes, they become able to solve the problem and move on to the next step. Do you want someone to get help for my mathematics laboratory? Students from all over, choose Mymathlabs to obtain assistance in the field of mathematics. MyMathlab opens their learning door for students from different stages and different fields. It is made for them to obtain assistance in mathematics according to the demand for their theme and field. If you also want to obtain assistance for MyMathlab for school, you are in the right hand and source. Are you using Mypearsonlab and trapped in completing the task or task? Are you stuck for having insufficient knowledge about how to solve the problem? Your deadline to complete the task in Mimath; Ab is close and you are finding the diffamile question? There are so many reasons why you may need assistance to solve mathematical problems and why you can get help from an experienced person to solve the question. The answers to these questions are few but effective. Free a free quote now! Although you can find multiple sources in line to obtain assistance. You can assure you that you get a answer about how to obtain mymathlab responses, but few of them can really provide the reliable and effective source to obtain answers. Solve Solveexercises and practice questions until you have the idea of solving MyMathlab problems. This step requires a lot of time and your attention, but you will learn the steps you can use to complete MyMathlab's task. While, if you're in a hurry and you can't spend much time to learn things from the beginning, use other ways to get the answers. As, you will not necessarily be able to answer the most difficult question learning the concepts and steps through the solution of other questions. The best way is, is to learn the path of any expert or learn from the MyMathlab response key. In this way you can get the idea by analyzing the steps used to solve the problem. Basqua in the line to obtain responses from multiple sources one of the main and forth ways to look for the answers of MyMathlab's task is to obtain help from sources in line. You can search the question on the question, using the effective bust. You can directly make people about the solution of the question, approaching them on websites and social media pages. The pages and social networks are numerous. People remain constantly committed on these websites such as: Facebook, Skype, etc. You can ask people directly about providing the answer to MyMathlab. This is the most important and unknown way of approaching people, with the many possibilities that people will respond to their consultation or post. It can be fortunately you will find the right person who can have a good command on the rules and all of mathematics. In this way you will get the source that can help you get the desired mathlab responses. Another way to obtain Pearson's Mimathlab response key is to ask people in Reddit and Quora.
